AIDS TO PROPER MAILING

Write name and address plainly and completely.

Place name and address of sender on all mail matter.

Prepay postage fully.

Use street and number in return address on your envelope and also letter heads.

Always address mail for city delivery to street and number, and request correspondents to do likewise.

Use designation North or South, West or East when it is a proper part of the address and save delay in delivery.

Insure valuable parcels.

Wrap parcel post carefully in heavy paper, and tie knots securely.

Do not use cards or envelopes smaller than a Government Postal Card.

Avoid the use of the word "City" as a part of the address. It may result in delay.

Avoid abbreviation of state names; Pa., Va., and La., frequently look very much alike when written. It is difficult to distinguish between Me., Mo., and Ind., or Col., and Cal. The abbreviation recommended for Colorado is Colo., and for California is Calif.

YOU WILL OFTEN GAIN A DAY'S TIME IN DELIVERY BY DEPOSITING MAIL AS SOON AS IT IS READY.

Pamphlets showing the hours "Mails Close" at the post office, and the time in transit between all of the large cities in the United States, may be had upon application to the Superintendent of Mails.

Every Home Needs This Help

—help that never takes a holiday—the telephone.

During the day—it runs errands, saves trips in bad weather, keeps you in touch with friends, makes it easy for friends to keep in touch with you.

In the evening you can ask friends over, take care of a business matter or enjoy a chat with a friend or a relative near or far.

Any time, day or night, your telephone is always ready to bring help in an emergency.

The cost is perhaps no more than you and your family spend at public telephones. Why not order today at the Business Office and have your name in the next issue of the telephone directory?

Every Home Needs This Help

—help that never takes a holiday—the telephone.

During the day—it runs errands, saves trips in bad weather, keeps you in touch with friends, makes it easy for friends to keep in touch with you.

In the evening you can ask friends over, take care of a business matter or enjoy a chat with a friend or a relative near or far.

Any time, day or night, your telephone is always ready to bring help in an emergency.

The cost is perhaps no more than you and your family spend at public telephones. Why not order today at the Business Office and have your name in the next issue of the telephone directory?

Why Waste Energy?

Mrs. Johnson knows the advantages of saving her energy. That's why she has extension telephones. They save her hundreds of steps a day. There's a telephone in the kitchen, one in the living room beside her easy chair, and, of course, one in the bedroom.

No wonder she looks and feels better than the rest of her friends!

GUILTY?
Is there one of us who doesn't owe a letter—to someone—some place . . . ? If we plead guilty, let's pass an easy sentence on ourselves: telephone that overdue letter—instead of writing! It's much more satisfying and costs so little, especially after 7 P. M. and all day Sunday when reduced rates are in effect to most places.

When you install extension telephones you add more comfort and convenience to your home. Always within reach, they save countless footsteps and the annoyance of running from one end of the apartment to the other every time the telephone rings. Your home deserves this added up-to-dateness, especially since it costs so little.

Our nearest Business Office will be glad to suggest convenient telephone arrangements for your home.

Job Lot Merchandise

To telephone someone at a distance is thrilling, and shows sincere friendship. Costs less than you imagine.

WASTED STEPS

The average wife walks several miles in her daily household duties. Trudging back and forth to answer the telephone—accounts for many hundred needless steps.

How to save them? Simply have an extension telephone within a dozen steps of you at all times—whether you're in the living room, kitchen or bedroom. You'll never feel the cost—it's only a few cents a day for each extension telephone.

Every Home Needs This Help

—help that never takes a holiday—the telephone.

During the day—it runs errands, saves trips in bad weather, keeps you in touch with friends, makes it easy for friends to keep in touch with you.

In the evening you can ask friends over, take care of a business matter or enjoy a chat with a friend or a relative near or far.

Any time, day or night, your telephone is always ready to bring help in an emergency.

The cost is perhaps no more than you and your family spend at public telephones. Why not order today at the Business Office and have your name in the next issue of the telephone directory?

Every Home Needs This Helper

—help that never takes a holiday —the telephone.

During the day—it runs errands, saves trips in bad weather, keeps you in touch with friends, makes it easy for friends to keep in touch with you.

In the evening you can ask friends over, take care of a business matter or enjoy a chat with a friend or a relative near or far.

Any time, day or night, your telephone is always ready to bring help in an emergency.

The cost is perhaps no more than you and your family spend at public telephones. Why not order today at the Business Office and have your name in the next issue of the telephone directory?

COMFORT

When you install extension telephones you add more comfort and convenience to your home. Always within reach, they save countless footsteps and the annoyance of running from one end of the apartment to the other every time the telephone rings. Your home deserves this added up-to-dateness, especially since it costs so little.

Our nearest Business Office will be glad to suggest convenient telephone arrangements for your home.

WASTED STEPS

The average wife walks several miles in her daily household duties. Trudging back and forth to answer the telephone—accounts for many hundred needless steps.

How to save them? Simply have an extension telephone within a dozen steps of you at all times—whether you're in the living room, kitchen or bedroom. You'll never feel the cost—it's only a few cents a day for each extension telephone.

WHAT THE TELETYPEWRITER SERVICE IS, AND HOW IT OPERATES

The teletypewriter looks and operates like an ordinary typewriter. Messages, reports, inquiries, typed in your office are *instantly* and identically reproduced on any other teletypewriter to which it is connected . . . 300 feet or 3,000 miles away.

As a subscriber to this Bell System service, your typist simply calls the desired teletypewriter by typing its number and "central" immediately makes the connection.

TEN OUTSTANDING FEATURES

Availability . . The same as telephone service. Teletypewriter "central" will connect any subscriber anywhere in the United States at any time to any other subscriber.

Speed . . Connections are fast—comparable to the telephone.

Two-Way . . Subscribers can type back and forth on the same connection, making inquiries and replies possible.

Accuracy . . The copy received is identical with that transmitted . . . Ambiguities in text can be clarified during the connection.

Simplicity . . Any competent typist can operate it.

Privacy . . Communication is direct between sender and receiver.

Flexibility . . Letter-sized paper or your own forms for orders, reports, deliveries, and similar matters can be used . . . As many as six copies can be made by each teletypewriter.

Permanent Records . . Each subscriber has typewritten copy.

Low Cost . . A most economical form of written communication.

Dependability . . A Bell System service.

Personal Contact

Personal contact—with whomever you wish—in any part of the country. The telephone gives you this personal, voice-to-voice contact. It puts speed and convenience in the administration of business. A long distance call frequently saves a railroad trip; it often means a customer satisfied; or a carload of goods sold. Yet it costs so little—even to places far away!

GUILTY?

Is there one of us who doesn't owe a letter—to someone—some place . . . ? If we plead guilty, let's pass an easy sentence on ourselves: telephone that overdue letter—instead of writing! It's much more satisfying and costs so little, especially after 7 P. M. and all day Sunday when reduced rates are in effect to most places.

How much does a Telephone SAVE?

Saves the cost of making calls from public telephones. Saves catching colds through going out in bad weather to make calls, saves the cost of curing that cold — to say nothing of the probable pressing, cleaning and repairing bills.

Saves worrying about members of the family when they're delayed reaching home. Or worrying about relatives in other places.

Two or three nickels keep a telephone in your home. Why not order today at the Business Office.

A New Way TO GET TOGETHER

How would you like to talk to as many persons as you name at the same or different times over the telephone conference? If you have to meet a business conference or just meet the family together on important holiday occasion, it can be arranged as easily and conveniently as though everyone were seated around a table. Just call or dial long distance and ask for the Conference Circuit. The operator will arrange to connect your telephone with those of the other members of your conference. It is as easy to do as regular long distance service. A & the Conference Operator is to guide you to do.

Why Waste Energy?

Mrs. Johnson knows the advantages of saving her energy. That's why she has extension telephones. They save her hundreds of steps a day. There's a telephone in the kitchen, one in the living room beside her easy chair, and, of course, one in the bedroom.

No wonder she looks and feels fresher than the rest of her friends!
